

Dear Customer,

Thank you for taking the time to design a gate with GateCrafters.com - we are honored to deliver a skillfully crafted gate to your door. To show our gratitude, we would like to offer you a limited time offer: huge savings on one of the highest quality gate openers with the purchase of one of our semi-custom driveway gates.

For any gate order over \$1,499.99, we will offer you 50% off an Estate Swing Classic gate opener.

The Estate Swing Classic series features a design that has been in use for over 30 years. This is paired with advanced electronics that completely eliminates tricky programming. The Estate Swing Classic is "So smart, it's simple."

Some features include:

No Learning Procedure - This is the single most advantageous aspect of these innovative gate openers. This intelligent control board allows you to run the gate opener as soon as everything is wired in. Other gate openers require a learning procedure that may require repeated reconfiguring. The Estate Swing Classic line eliminates all those hassles.

Reliable, Time-tested Design - The Classic series of the Estate Swing is identical to the design of the first electro-mechanical automated gate opener. This design has been used for over 30 years and is still in use around the globe. **This is the design that started it all by demonstrating that electro-mechanical gate systems could be more reliable, efficient and cost effective than hydraulic driveway gate openers.**

Adjustable Magnetic Limit Switches - The limit switches on this Estate Swing gate opener are easy to adjust because they are on the exterior of the arm; simply slide them to the desired location and secure by tightening a screw. Secondly, both the open and closed point is adjustable; this allows more flexibility for adjusting the stopping points after the brackets are bolted into place. Lastly, they are magnetic so there are no components to wear out from repeated contact.

Large, 24V Motor - This is one of the largest motors available for any residential dual gate opener. It is capable of handling electric gates up to 600 lbs, which is more than many heavily ornamented electronic gates weigh.

AND MUCH MORE!

*Note: The Estate Swing Classic gate openers require a power outlet within 200' of the gate opener.
