

*Dear Customer,*

Thank you for taking the time to design a GateCrafters.com semi-custom sliding gate. Our cantilever style sliding gates are manufactured in the USA by skilled craftsman and we are honored to provide you with a quality made product. To show our gratitude for your selection we would like to offer you a limited time offer with huge savings on an Estate Slide Gate Opener with your semi-custom driveway gate purchase.

For any cantilever style sliding gate over \$1,500 purchased from GateCrafters.com you will receive half off an Estate Swing E-SL 450B gate opener!

### **The E-SL 450B Estate Slide Operator**

What makes this gate opener different from all others is the use of a belt drive system; it is a true leap forward in gate opener quality. In the past there were two choices: chain drive or rack and pinion. Chain drive was great for an easy flexible installation, but as we all know with bicycle chains they are greasy, noisy and frequently come off of their gears. Rack and pinion made for clean, quiet, maintenance free operation however the installation procedure requires a gate ready to mount a level, stable rack along the entire bottom. Belt is the best of both worlds! The belt attaches to the provided brackets on each end of the gate. It runs over an idler, under the mechanized gear and over another idler. That's it, a simple installation just like chain. However unlike chain the belt make no noise, require no grease, and don't become dislodged from their gears.

The E-SL 450B uses 24V DC power, making it safe for end user installation and maintenance. It is also battery operated. Offering the ease one touch EZ programming this sliding gate opener can be programmed by pressing one button! Combined with the Estate Swing Double Range Remote you can have built-in security with rolling code technology and over 200 foot range! Additionally, the pedestrian button function opens the gate to a 3 foot gap - the perfect amount of space to allow a person to walk through.

#### **Other features of the E-SL 450 include:**

- Built in Control Board
- Terminals for entry/exiting accessories and safety devices
- Auto-closing can be turned on or off, time delay is adjustable
- 24V Battery included
- 24VAC Transformer
- Built in Receiver
- Limit Magnet (normally closed position)
- Legendary Reliability
- High Carbon Steel gears and bearings
- Automatic Entrapment/Obstruction Sensor
- Locked Manual Release

Finally, this Estate Slide Operator can be used with most wired accessories including exit wands, exit & safety loops, keypads, and communication systems. With both a GateCrafters.com cantilever style sliding gate and the E-SL 450B Estate Slide Opener you can have the ultimate combination of design and functionality.
